

THE LIZARDS AND AMPHISBAENIANS OF BOLIVIA (REPTILIA, SQUAMATA): CHECKLIST, LOCALITIES, AND BIBLIOGRAPHY

L. Dirksen (*) and I. De la Riva (**)

ABSTRACT

The number of Bolivian lizards and amphisbaenids is increased from 79 (Fugler, 1989) to 102 in this updated and comprehensive list, which includes all new species and taxonomic changes published recently, as well as locality data. Coordinates for the localities are provided in a locality list. Three species are reported herein for the first time: *Kentropyx pelviceps*, *Liolaemus schmidti*, and *Uranoscodon superciliosus*.

Key words: Saurians, Amphisbaenians, distribution, bibliography, Bolivia.

RESUMEN

Los saurios y anfisbénidos de Bolivia (Reptilia, Squamata): lista patrón, localidades y bibliografía

El número de saurios y anfisbénidos conocidos en Bolivia se incrementa de 79 especies (Fugler, 1989) a 102 en la presente lista actualizada, que incorpora todas las especies nuevas, los cambios taxonómicos recientes y todas las localidades de colecta conocidas con sus coordenadas. Tres especies son citadas para Bolivia por primera vez en este trabajo: *Kentropyx pelviceps*, *Liolaemus schmidti* y *Uranoscodon superciliosus*.

Palabras clave: Saurios, Anfisbénidos, distribución, bibliografía, Bolivia.

Introduction

Bolivia lies in the middle of South America, between the high Andes in the West, the hot and wet Amazonia in the North and the dry Chaco in the South. These conditions account for a large variety of different microclimates and ecosystems with their particular flora and fauna. The biological diversity of Bolivia is still poorly known, even at a lesser extent than that of other South American countries. This fact affects not only to invertebrates but to vertebrates as well. Among these, there is a remarkable lack of information on reptiles, especially Squamata. Fugler (1989) presented a preliminary checklist of lizards and

amphisbaenians, in which he reported 79 species. As a result of our own investigations in Bolivia, research in museum collections (through direct examination of specimens and critical evaluation of collection catalogues) and an extensive literature work, we can now increase substantially the number of species of Bolivian lizards and amphisbaenians. In this paper we present an updated list of the lizards and amphisbaenians of Bolivia, the localities where they are known, and a comprehensive bibliography on this topic. Probably, several references containing additional localities might have been overlooked, but, overall, we hope this list is a useful tool for anybody interested in Bolivian herpetology.

Material and methods

All data are based on published records or voucher specimens. No records from field observations are given unless specimens were collected. If we did not examine the specimens but based our work on a museum collection catalogue, we only accepted localities as valid if they are near to other localities known for the species considered, or at least they fall in the same general type of ecosystem. We did not include new species for Bolivia based solely on collection catalogues if we have any doubt about their determination or locality. The locality data from museum unpublished catalogues were some times hand-written and often the data are vague, misspelled and usually coordinates are missing. Obvious misspellings were corrected. Localities too imprecise (i. e., "Alto Beni", "Los Yungas", "Province Sara", "Cordillera Tres Cruces", "Altiplano", etc.) usually are not listed in the gazeteer (Appendix 1); those that could not be found are indicated by an asterisk (*). Usually, coordinates given as kilometric distances from a given point (i. e., a river mouth or town) are not provided. Instead, we provide coordinates of the locality of reference. Fig. 1 shows the situation of Bolivia in the continent and its political divisions.

We used the name Río Iténez instead Río Guaporé for the river on the Bolivian and Brazil boundary. Both names are equally found in literature and maps.

The species are sorted within the genus by alphabetical order and the genus in the same way within families. We follow the arrangement proposed by Frost & Etheridge (1989) for the old family Iguanidae. In agreement with Avila-Pires (1995), we do not follow the arrangement proposed by Guyer & Savage (1986, *Syst. Zool.*, 35: 509-531) for anoles.

Geographic records are listed by Bolivian departments (underlined), which are arranged in alphabetic order. A citation consists of a locality and its source (an author or a museum acronym), separated by a comma, and it is finished by a point. The citations are arranged by chronological order when they come from published data and by alphabetical order of museum acronyms when they come from collections. A semicolon is between localities, if more than one locality is cited from the same source. We used a comma if the locality is briefly described (i. e., San Antonio, Río Mapiri). Citations have been translated if they were originally in a language other than English and included more or less long sentences.

Fig. 1.— Map of Bolivia showing the nine departments and their capitals.

Fig. 1.— Mapa de Bolivia donde se indican los nueve departamentos y sus capitales.

Published data for a given department are reported first, followed by museum data. When for a species more than one record was found for the same locality (for example, both in the literature and museum collections), we used it only once. In this case, we always preferred to give credit to an author rather than using museum information. Likewise, in the case that a record was provided both in an unpublished thesis or report and in a publication, we have given priority to the publication irrespective of which document was the oldest. When more than one author provided the same record, we gave preference to the oldest publication. Only the first acronym museum in alphabetical order is used in the case of having the same data from more than one museum. We have tracked the history of taxonomic changes of the species and subspecies considered herein, but we do not offer lists of synonyms to avoid making this paper extremely long. Thus, it can appear a citation in which the species and the authorship are different from those of the original citation. For example, Peracca (1897) cited *Amphisbaena camura* Cope at Caiza;

this population is presently considered as belonging to the species *A. bolivica* Mertens. Thus, the record of *A. bolivica* at Caiza is herein credited to Peracca, despite of the fact that in Peracca's publication, the name *A. bolivica* does not appear. Likewise, if the name of a locality changed through time, we have used the current name.

Bibliographic references listed at the end of this paper intend to be exhaustive and not limited to those cited in the main text. References containing the original descriptions of all the species considered are included, as well as references dealing with Bolivian saurians but providing no locality data.

Museum acronyms follow Leviton *et al.*, (1985, Copeia 1985: 802-832). Other institutions not reported therein are:

CBS- Colección Boliviana de Fauna (before: IE- Instituto de Ecología plus Museo Nacional de Historia Natural), La Paz, Bolivia

CET- Centro de Estudios Tropicales, Sevilla, Spain

MNK- Museo de Historia Natural "Noel Kempff Mercado", Santa Cruz de la Sierra, Bolivia

Abbreviations used: Dpto.= departamento (department); N= North; E= East; S= South; W= West; ca.= circa; Cd= Ciudad (city); ft= feet; km= kilometers; m= meters; mi= miles.

The amphisbaenians and lizards of Bolivia

AMPHISBAENIDAE

Amphisbaena alba Linnaeus, 1758

Beni: Río Mamoré (Cope, 1862a). Guayaramerín (Fugler, 1984). La Paz: Upper Río Beni (Cope, 1885). Santa Cruz: Province Sara (Griffin, 1917). Esperanza (Procter, 1921). 2 km from Concepción on San Ignacio road, CET. Santiago, FMNH. Santa Cruz de la Sierra, MNK. Buena Vista; Río Surutú, UMMZ. Airport Viru Viru, ZFMK. Tarija: Villa Montes, ZFMK.

Amphisbaena angustifrons Cope, 1861

Beni: San Joaquín, FMNH. Cochabamba: Río Ichilo, ca. 54 km S Boca Chapare, AMNH. Tarija: Upper Río Pilcomayo (Parker, 1928a). Ca. Villa Montes (Hellmich, 1960).

Amphisbaena bolivica Mertens, 1929

Beni: Riberalta (Montero, 1996). Estancia El Porvenir, ZFMK. Santa Cruz: Buenavista (Gans, 1965). Tarija: Caiza (Peracca, 1897). Villa Montes (Mertens, 1929).

Amphisbaena camura Cope, 1862

Beni: "Headwaters of the Amazon river, Bolivia" (Werner, 1910). San Joaquín, FMNH. Magdalena, USNM. El Porvenir,

ZFMK. Santa Cruz: San José de Chiquitos (Gans, 1960). Buena Vista (Hellmich, 1960). Santa Cruz de la Sierra (Gans, 1965). Parque Nacional Amboró (Lavilla *et al.*, 1996). Pampa Grande (Montero, 1996). Tarija: Caiza; Villa Montes (Hellmich, 1960).

Amphisbaena cegei Montero, Sáfadez & Álvarez, 1997

Santa Cruz: Pampa Grande (Montero *et al.*, 1997).

Amphisbaena darwini Duméril & Bibron, 1839

La Paz: Sorata (Boettger, 1891). San Antonio, Río Mapiri (Werner, 1910). Tarija: Caiza (Peracca, 1897).

Amphisbaena fuliginosa Linnaeus, 1758

Chuquisaca: Charobamba (Rhodes, 1963). Cochabamba: Villa Tunari, MNK. La Paz: Sorata (Boettger, 1891). Los Yungas; Tipuani (Rhodes, 1963). Santa Cruz: Puerto Almacén (De la Riva, 1993). Campamento, Río San Martín (Montero *et al.*, 1995). Los Fierros (Scrocchi & González, 1996).

Amphisbaena silvestrii Boulenger, 1902

Santa Cruz: Buena Vista (Gans, 1964).

Amphisbaena slateri Boulenger, 1907

La Paz: Pelecnes (= Pelechuco), NE Titikaka Lake; San Antonio, Río Mapiri (Gans, 1967).

Amphisbaena vermicularis Wagler, 1824

Santa Cruz: San Ignacio de Velasco (Hellmich, 1960). Tarija: Villa Montes, ZFMK.

Cercophis borelli (Peracca, 1897)

Santa Cruz: Finca de Milanos; Santa Cruz de la Sierra (Montero *et al.*, 1995). Cupés (González, 1998). Tarija: Caiza (Peracca, 1897).

Cercophis steindachneri (Strauch, 1883)

Santa Cruz: Puerto Almacén (De la Riva, 1993). El Refugio (Harvey, 1995).

Leposternon microcephalum Wagler, 1824

Cochabamba: Villa Tunari, KU. Santa Cruz: Province Sara (Griffin, 1917). Buena Vista (Fugler, 1989). Parque Nacional Amboró; Yapacaní (Lavilla *et al.*, 1996). Río Surutú, UMMZ.

ANGUIDAE

Diploglossus fasciatus (Gray, 1831)

Beni: Cachuela Esperanza, AMNH. La Paz: Sorata (Boettger, 1891). Confluence of the Río Kaka and the Río Beni (Barbour, 1909). Alto Beni, ANSP.

Ophiodes intermedius Boulenger, 1894

Beni: Rancho "San Marcos", in the confluence of the Isiboro and Ichoa rivers (Fugler, 1989). Cochabamba:

Cochabamba (Werner, 1910). Santa Cruz: El Fuerte (Dirksen *et al.*, 1995). Pampas Unión (Montero *et al.*, 1995). Vallegrande, MNK.

***Ophiodes yacupoi* Gallardo, 1966**

Santa Cruz: Guadalupe (Montero *et al.*, 1995).

GEKKONIDAE

***Gonatodes hasemani* Griffin, 1917**

Beni: Villa Bella (Griffin, 1917). Tumi Chucua (Fugler, 1983). Ivon, AMNH. Pando: Ingavi, on N bank of Río Orthon; San Juan del Nuevo Mundo, USNM.

***Gonatodes humeralis* Guichenot, 1855**

Beni: Villa Bella (Griffin, 1917). Tumi Chucua (Fugler, 1983). Ivon, AMNH. Pando: Abuná (Schmidt & Inger, 1951). Ingavi, on N bank of Río Orthon, USNM. Santa Cruz: Puerto Almacén (Montero *et al.*, 1995). Parque Nacional Noel Kempff Mercado (Harvey *et al.*, 1998). San José de Chiquitos, ZFMK.

***Hemidactylus mabouia* (Moreau de Jonnès, 1818)**

Beni: Río Mamoré (Kluge, 1969). Guayaramerín (Fugler, 1984). Pando: Cobija (Fugler, 1984). 25 km S of Cobija (Fugler, 1988a). Santa Cruz: Concepción (Dirksen, 1995). Pampa Grande; Samaipata (Lavilla *et al.*, 1996). Flor de Oro (Scrocchi & González, 1996). Santa Cruz de la Sierra, CET.

***Homonota dorbignyi* (Duméril & Bibron, 1836)**

Chuquisaca: "Along Río Grande at Pampa Ruiz (between Valle Grande and Pescado)" (DUMÉRIL & BIBRON, 1836).

***Homonota fasciata* (Duméril & Bibron, 1836)**

Cochabamba: Dpto. Cochabamba, UMMZ. Santa Cruz: Huasacafíada (Montero *et al.*, 1995). Pampa Grande (Lavilla *et al.*, 1996). Cerro Colorado; La Madre; Yapiroa (González, 1998). San José de Chiquitos, AMNH. Tarija: Aguairenda; Caiza (Peracca, 1897). Villa Montes (Mertens, 1929). Andes of Catamarca (Hellmich, 1960).

***Lygodactylus wetzeli* Smith, Martin & Swain, 1977**

Santa Cruz: Cerro Colorado; Cupés; Tierras Nuevas (González, 1998). Charagua, AMNH. Tarija: ca. Villa Montes (Fugler, 1989).

***Phyllopezus goyazensis* Peters, 1887**

Santa Cruz: Puerto Suárez (Griffin, 1917). Tarija: San Francisco (=Villa Montes) (Peracca, 1897).

***Phyllopezus pollicaris* (Spix, 1825)**

Santa Cruz: Puerto Suárez (Griffin, 1917). El Carmen; El Portón; 3 km S of Roboré; San José de Chiquitos (Gans, 1960). Buena Vista; San Ramón, N of San José de Chiquitos (Hellmich, 1960). Inselberg (Dirksen, 1995). Parque Nacional Amboró (Lavilla *et al.*, 1996). Cerro Colorado; Cupés; La

Madre; Tierras Nuevas; Yapiroa (González, 1998). San José de Chiquitos, AMNH. Santa Cruz, CAS. Santiago, FMNH. Tarija: Villa Montes (Hellmich, 1960).

***Thecadactylus rapicauda* (Houttuyn, 1782)**

Beni: Tumi Chucua (Fugler, 1983). Río Quiquibey (Fugler, 1984). Río Yata (on road from Guayaramerín to Cachuela Esperanza), AMNH. La Paz: Tumupassa, AMNH. Pando: Abuná (Schmidt & Inger, 1951). 25 km S of Cobija (Fugler, 1984). Río Madre de Dios, ZMH.

GYMNOPHTHALMIDAE

***Bachia dorbignyi* (Duméril & Bibron, 1839)**

Beni: Reyes (Boulenger, 1898). Estancia El Porvenir (De la Riva *et al.*, 1992). Río Curiraba, Beni Biosphere Reserve, USNM. Cochabamba: Villa Tunari, KU. La Paz: Barraca, Río Madidi; Misiones Mosetenas (Boulenger, 1898). Tumupassa (Burt & Burt, 1931). Pando: Reserva Nacional Amazónica Manuripi-Heath (Aparicio, 1992). Santa Cruz: Santa Cruz de la Sierra (Duméril & Bibron, 1839). Las Juntas (Griffin, 1917). Esperanza (Procter, 1921). Buena Vista (Parker, 1928b). Río Surutú (Dixon, 1973). San Pablo (Dirksen, 1995). Parque Nacional Amboró (Lavilla *et al.*, 1996). Yapiroa (González, 1998). Lomas de Arena, CET.

***Cercosaura ocellata* Wagler, 1830**

La Paz: Tumupassa (Ruibal, 1952). Pando: Reserva Nacional Amazónica Manuripi-Heath (Aparicio, 1992). Santa Cruz: Province Sara (Griffin, 1917). Río Surutú (Ruibal, 1952). Buena Vista; Parque Nacional Amboró; San Juan del Potrero (Lavilla *et al.*, 1996).

***Iphisa elegans* Gray, 1851**

Cochabamba: Dpto. Cochabamba (Dixon, 1974). Puerto San Mateo (Avila-Pires, 1995). Santa Cruz: Parque Nacional Noel Kempff Mercado (Harvey *et al.*, 1998).

***Micrablepharus maximiliani* Reinhardt & Lütken, 1862**

Santa Cruz: Cerro Colorado (González, 1998).

***Neusticurus ecleopus* Cope, 1876**

Bolivia: Río Beni (Werner, 1910). La Paz: Misiones Mosetenas (Boulenger, 1898). "Yungas, ca. 1000-1800 m (sic), Río Suapi and Songo" (Werner, 1910). 1.6 km W of Puerto Linares (Fugler, 1984). Ca. 40 km from Caranavi to Beni, Serranía Bellavista, CET. Santa Cruz: Río Saguayo, Parque Nacional Amboró (Montero *et al.*, 1995). Buena Vista; Parque Nacional Amboró (Lavilla *et al.*, 1996).

***Neusticurus ocellatus* Sinitzin, 1930**

Beni: Rurrenabaque (Sinitzin, 1930).

***Opipeuter xestus* Uzzell, 1969**

Chuquisaca: El Palmar (Harvey, 1997). Cochabamba: Incachaca; Locotal; Monte Punco; Paracti; Yungas de

Cochabamba; Yungas del Palmar (Uzzell, 1969). Sehuencas (Köhler *et al.*, 1995). La Siberia; Río Chua Khocha, CET; Tablas montes, MNK. Tucachaca, UMMZ. Santa Cruz: Remates, N of San Juan del Potrero, ZFMK.

Pantodactylus schreibersii (Wiegmann, 1834)

Beni: Rurrenabaque (Ruibal, 1952). Estación Biológica Beni; Rancho “San Marcos”, in the confluence of the Río Isiboro and Río Ichoa (Fugler, 1989). Guayaramerín; Santa Rosa, AMNH. San Joaquín, FMNH. Chuquisaca: El Palmar (Harvey, 1997). Cochabamba: Boca Chapare; 4 km S Boca Chapare; 54 km S Boca Chapare, AMNH. La Paz: Chulumani; Coroico (Boulenger, 1898). Ixiamas; Tumupassa (Ruibal, 1952). 15 km before Chulumani; ca. 1 mi W of Puerto Linares; Yanacachi, USNM. Santa Cruz: Buena Vista (Burt & Burt, 1931). El Fuerte (Dirksen *et al.*, 1995). El Refugio (Harvey, 1995). Pampa Grande; Parque Nacional Amboró (Lavilla *et al.*, 1996). Samapata, CET. Santa Cruz de la Sierra, MNK. Río Surutú, UMMZ. Tarija: Caiza; San Francisco (Peracca, 1897). San Francisco, Upper Pilcomayo River (Hellmich, 1960). Sunchal (Fugler, 1989).

Prionodactylus argulus (Peters, 1862)

Cochabamba: Monterredondo (Uzzell, 1973). La Paz: San Fermín (Andersson, 1914). Santa Cruz: Buena Vista (Uzzell, 1973). Parque Nacional Amboró (Lavilla *et al.*, 1996).

Prionodactylus eigenmanni Griffin, 1917

Beni: Rancho Espíritu, Río Yacuma; Rurrenabaque (Uzzell, 1973). Pando: San Juan del Nuevo Mundo, USNM. Santa Cruz: Province Sara (Griffin, 1917). Perseverancia (Hoogmoed & Vaca, 1990). Buena Vista (Avila-Pires, 1995). Parque Nacional Amboró (Lavilla *et al.*, 1996).

Prionodactylus manicatus (O’Shaughnessy, 1881)

Beni: Rancho San Marcos, in the confluence of the Isiboro and Ichoa rivers, (Fugler, 1989). Cochabamba: Yungas de Cochabamba (2200 m), UMMZ. La Paz: Chaco (Werner, 1899).

Proctoporus boliviensis Werner, 1910

La Paz: Sorata (Werner, 1910). Pelechuco (Andersson, 1914).

Proctoporus guentheri (Boettger, 1891)

Cochabamba: Cochabamba, 2516 m; Yungas del Palmar (Uzzell, 1970). La Paz: Sorata (Boettger, 1891). Calabatea (Emmons, 1991). Santa Cruz: El Fuerte (Dirksen *et al.*, 1995).

Ptychoglossus brevifrontalis Boulenger, 1912

Cochabamba: Cochabamba Valley (Harris, 1994).

Vanzosaura rubricauda (Boulenger, 1902)

Beni: Dpto. Beni (Werner, 1910). Cochabamba: Dpto. Cochabamba, UMMZ. Santa Cruz: Cerro Colorado (González, 1998). San Antonio de Parapeti, AMNH. Tarija: Villa Montes (Hellmich, 1960).

HOPLOCERCIDAE

Enyaliodoides palpebralis (Boulenger, 1883)

Bolivia: NW Bolivia (Avila-Pires, 1995).

Hoplocercus spinosus Fitzinger, 1843

Santa Cruz: El Refugio (Harvey, 1995). 10 km S of Colonia San Martín (Scrocchi & González, 1996).

IGUANIDAE

Iguana iguana (Linnaeus, 1758)

Beni: Tumi Chucua (Fugler, 1985). Arroyo Grande; 8 km N of Exaltación; Guayaramerín; 20 km W of La Rangeira; Puerto Cap. Vázquez; Puerto Moré; Río Mamoré (12°59' S); Santa Fé, Río Iténez, AMNH. Riberalta, UMMZ. Pando: Abuná (Schmidt & Inger, 1951). Reserva Nacional Amazónica Manuripi-Heath (Aparicio, 1992). Santa Cruz: Florida (De la Riva *et al.*, 1992). Flor de Oro (Scrocchi & González, 1996).

POLYCHROTIDAE

Anolis fuscoauratus D’Orbigny, 1837

Beni: Río Mamoré, between Loreto and the mouth of Río Sara (D’Orbigny, 1847). “Province of Moxos” (Bocourt, 1873). Estación Biológica Beni (Fugler, 1989). Río Mamoré, 10 km E of San Antonio; Santa Rosa, AMNH. Cochabamba: 40 km from Villa Tunari to Cochabamba, CET. Valle de Sajta, MNK. Locotal; Yungas de Cochabamba, UMMZ. La Paz: Sorata (Boettger, 1891). Ca. 1.6 km W of Puerto Linares (Fugler, 1984). Mapiri, AMNH. Santa Cruz: Buena Vista (Barbour, 1934). Parque Nacional Amboró (Lavilla *et al.*, 1996). 2 km N of Boca Chapare, AMNH. Río Surutú, UMMZ.

Anolis meridionalis Boettger, 1885

Beni: Estancia Yutiale, 20 km S of San Joaquín; 23 km W of San Javier; 10 km W of San Pedro, AMNH. Santa Cruz: Province Sara (Griffin, 1917). Buena Vista (Barbour, 1934). Parque Nacional Amboró (Lavilla *et al.*, 1996). Río Surutú, UMMZ.

Anolis ortonii Cope, 1868

Beni: Tumi Chucua (Fugler, 1983). La Paz: Chulumani; Coroico (Boulenger, 1898).

Anolis punctatus Daudin, 1802

Beni: Rurrenabaque; Santa Rosa, Río Mamoré (Fugler, 1988b). La Paz: Río Chimate (Fugler, 1988b). Pando: ca. 12 km by road S of Cobija and 8 km from Mucden (Fugler, 1988b). Santa Cruz: Dpto. Santa Cruz de la Sierra (Griffin, 1917). Buena Vista (Fugler, 1988b). Puerto Almacén (De la Riva, 1993). Parque Nacional Amboró (Lavilla *et al.*, 1996).

Anolis scapularis Boulenger, 1908

Santa Cruz: Province Sara (Boulenger, 1908). Parque Nacional Amboró (Lavilla *et al.*, 1996).

***Polychrus acutirostris* Spix, 1825**

Beni: Rancho San Marcos, in the confluence of the Isiboro and Ichoa rivers (Fugler, 1989). Estancia Edén, 25 km SW of San Joaquín; Estancia Yutiole, 20 km S of San Joaquín; Trinidad, AMNH. Chuquisaca: El Salvador (Montero *et al.*, 1995). Cochabamba: Dpto. Cochabamba, UMMZ. Santa Cruz: Asunción; Province Sara; Puerto Suárez (Griffin, 1917). Buenavista (Hellmich, 1960). Parque Nacional Amboró; Yapacaní (Lavilla *et al.*, 1996). San José de Chiquitos, AMNH. Santiago, FMNH. Río Surutú, UMMZ. Tarija: Aguairenda; Caiza (Peracca, 1897). Villa Montes (Hellmich, 1960).

***Polychrus liogaster* Boulenger, 1908**

Beni: Tumi Chucua (Fugler, 1983). Rurrenabaque (Fugler, 1984). Río Curichá (1 km from the confluence with Río Iténez); Santa Rosa, AMNH. Cochabamba: Dpto. Cochabamba, AMNH. Santa Cruz: Province Sara (Boulenger, 1908). Buena Vista (Avila-Pires, 1995). Ca. 40 km from San Javier to Concepción, CET. Parque Nacional Amboró; Warnes, MNK. Río Surutú, UMMZ.

***Urostrophus gallardoi* Etheridge & Williams, 1991**

Santa Cruz: Santa Cruz de la Sierra (Etheridge & Williams, 1991). Tarija: Border of Tarija river, entry to Salinas coming from Potrerillos, Reserva Nacional de Flora y Fauna de Tariquía (Torres, 1996).

SCINCIDAE

***Mabuya bistrigata* (Spix, 1825)**

Beni: Reyes (Boulenger, 1898). Tumi Chucua (Fugler, 1983). Rancho San Marcos, in the confluence of the Isiboro and Ichoa rivers (Fugler, 1989). 10 km W of Trinidad, ZFMK. La Paz: Misiones Mosetenas (Boulenger, 1898). 1.6 km W of Puerto Linares (Fugler, 1984). Pando: Abuná (Schmidt & Inger, 1951). Santa Cruz: El Carmen (Gans, 1960). El Refugio (Harvey, 1995).

***Mabuya cohabambae* Dunn, 1935**

Cochabamba: Pocona (Dunn, 1935). Ca. 100 km from Cochabamba to Santa Cruz, 3800 m (De la Riva *et al.*, 1992). Santa Cruz: Dpto. Santa Cruz (Dunn, 1935).

***Mabuya dorsovittata* Cope, 1862**

Santa Cruz: Puerto Suárez (Hellmich, 1960).

***Mabuya frenata* (Cope, 1862)**

Beni: Reyes; Riberalta; Río Beni (Dunn, 1935). Rancho San Marcos, in the confluence of the Isiboro and Ichoa rivers (Fugler, 1989). Puerto Almacén, AMNH. San Joaquín, FMNH. Riberalta, UMMZ. Cochabamba: Tiraque (Dunn, 1935). La Paz: Ixiamas (Dunn, 1935). Santa Cruz: Buena Vista (Dunn 1935). El Carmen (Gans, 1960). San José de Chiquitos (Hellmich, 1960). Puerto Almacén (De la Riva, 1993). Santa Rosa de la Roca (Dirksen, 1995). Abra de la Cruz (Lavilla *et al.*, 1996). Flor de Oro; Meseta de Caparuch (Scrocchi & González, 1996). La Madre; Tierras Nuevas; Yapiroa

(González, 1998). Santa Elena; Santiago, FMNH. Tarija: Aguairenda; Caiza; San Francisco (Peracca, 1897). Taringuiti, UMMZ.

***Mabuya guaporicola* Dunn, 1935**

Beni: Rancho San Marcos, in the confluence of the Isiboro and Ichoa rivers (Fugler, 1989). Santa Cruz: Dpto. Santa Cruz (Peters & Donoso-Barros, 1970). Parque Nacional Noel Kempff Mercado (Harvey *et al.*, 1998). Buena Vista, UMMZ.

***Mabuya nigropalmata* Andersson, 1918**

La Paz: San Fermín (Andersson, 1918).

***Mabuya nigropunctata* (Spix, 1825)**

Santa Cruz: Inselberg (Dirksen, 1995). Parque Nacional Noel Kempff Mercado (Harvey *et al.*, 1998).

TEIIDAE

***Ameiva ameiva* (Linnaeus, 1758)**

Beni: Reyes (Boulenger, 1898). Trinidad (Burt & Burt, 1930). Tumi Chucua (Fugler, 1983). Rurrenabaque (Fugler, 1984). Estancia Venecia; San Borja (De la Riva *et al.*, 1992). Camiaco; Chacabo Indian Village; Costa Márquez; El Remanso; Guayaramerín; Ivón; Pacusal; Pampa de Meio; Puerto Almacén; Puerto Caballo; Puerto Cap. Uranoscodon superciliosus (Linnaeus, 1758)

Beni: Guayaramerín, AMNH.

Conclusions

The lizards and amphisbaenians of Bolivia consist of ten families, 39 genera and 102 species (13 Amphisbaenidae, 3 Anguidae, 9 Gekkonidae, 15 Gymnophthalmidae, 2 Hoplocercidae, 1 Iguanidae, 8 Polychrotidae, 7 Scincidae, 14 Teeidae and 30 Tropiduridae). We add 24 species to the provisional checklist compiled by Fugler (1989), of which three are here reported for the first time: *Kentropyx pelviceps*, *Liolaemus schmidti*, and *Uranoscodon superciliosus*. This addition represents an increment of 29% in the saurian and amphisbaenian diversity of the country. Four species listed in Fugler (1989) do not occur in Bolivia or are synonyms: *Tropidurus hispidus* occurs in the Northeast of South America, *Liolaemus multiforis* is a synonym of *Liolaemus signifer*, *Homonota horrida* of *Homonota fasciata* and *Teius cyanogaster* of *Teius teyou*. It is surprising that Fugler (1989) did not mention the genus *Kentropyx* in Bolivia.

Nine species are endemic to Bolivia: *Amphisbaena bolivica*, *Amphisbaena cegei*, *Neusticurus ocellatus*, *Mabuya cochabambae*, *Liolaemus fittkaui*, *Liolaemus forsteri*, *Liolaemus islugensis*, *Liolaemus variegatus* and *Stenocercus marmoratus*.

Many new reptilian species were described in the last 10-20 years in South America, including Bolivia, where large areas still remain to be surveyed. It is realistic to assume that there are many more undescribed Bolivian species awaiting to be discovered, especially in the families Amphisbaenidae, Gymnophthalmidae and Tropiduridae. As a result, the numbers given above will increase in the future. New findings must be expected near the borders of the Amazonian Brazil, the Andean slopes of Peru and the highlands near Argentina and Chile.

ACKNOWLEDGMENTS

This research has been possible by the help of many persons and by the splendid collaboration with the museum staffs. We wish to thank all of them and, in particular, James Aparicio (CBF), Robert L. Besy (LACM), Wolfgang Böhme (ZFMK), Robert Drewes (CAS), William Duellman (KU), Richard Etheridge (SDSU), Linda S. Ford (AMNH), Lucindo González (MNK), Rainer Günther (ZMB), Jakob Hallermann (ZMH), Monique Halloy (FML), Marinus S. Hoogmoed (RMNH), Pierre L. Ibisch (FAN), Arnold G. Kluge (UMMZ), Jörn Köhler (ZFMK), Stefan Lötzter (ZFMK), Charles W. Myers (AMNH), Alan Resetar (FMNH), Greg Schneider (UMMZ), Gustavo Scrocchi (FML), John Simmons (KU), Barbara R. Stein (MVZ), and Harold Voris (FMNH). D. Frost and J. Wiens helped with some particularly problematic species. This paper is funded by project DGES PB97-1147, Spanish Ministry of Education and Culture (I. De la Riva, principal investigator).
